

To Whom it may concern,

We recently dealt with Sunled Energy for the upgrade of all our car park and fire stairs lighting at Meriton, Vantage North, I would highly recommend engaging in their services for LED lighting upgrades.

The sales consultant Jatin was extraordinarily diligent and considerate to our needs throughout the whole installation process, and the electrician Martan and team worked quickly and professionally to ensure that the work was all done promptly with minimal disruption for our residents.

LED lights provided us with far superior lighting compared to our old fluorescent and consuming less power. The motion sensor feature in the light's ensures that the lights turn on only when we require this helped us significantly to reduce our electricity bills. Lastly, the extremely competitive pricing offered by the Sunled team, the lights essentially pay for themselves in less than two years.

Extremely satisfied and glad to recommend them

Yours Sincerely,

**Angelo Psarros**
